

Bottling: GT Filler

Quality at an economical price

The GT filler is compact, easy to operate and offers the flexibility of fully automatic, standalone operation or can be integrated into a fully automatic bottling line. The GT Filler has been designed for smaller facilities and vertically integrated producers.

Corker also available for directional sparkling cork (on request)

Screw capper with feeding chute

Filler – available in 8 and 12 valve

Full stainless steel construction

The GT Filler is supported by our experienced Technicians from operator training to maintenance, for years of reliable support.

The GT filler's specification is fully customisable to suit your operations.

Choose from:

- Vacuum filling for greater speed or;
- Gravity filling under inert gas for gentle, bottle shock free packaging
- Single or two turret combination closure

Options include:

- Cork
- ROPP/Stelvin
- Crown seal
- GPI screw cap or;
- Glass and cork T-top stoppers
- 8 Head from 450 – 1400 BPH
- 12 Head from 1500 – 2000 BPH

Bottle sizes can be specified from:

- Ø55mm by 240mm high through to Ø115mm by 380mm high
- Quick, simple changes between bottle sizes with minimal change parts.

Safety:

Fully guarded, to comply with all Australian safety standards.
