

Product Information Sheet

S11

DESCRIPTION

S11 is a concentrated free flowing powder which once dissolved become a one step process solution for cleaning and sanitizing wine manufacturing equipment. S11 is a blend of heavy duty alkaline salts designed to remove tartrate build up, protein and all soils with hard water deposits from all wine contact surfaces.

APPLICATION

S11 is used to clean and remove protein stains, wine colour and organic soils from winery tanks and other surfaces (including external oak barrels). S11 is suitable for use on stainless steel, food grade plastics, glass and internal surfaces of wine hoses.

ACTIVE CONSTITUENTS

pH value 10.5–11.0 (1% solution)

Available Oxygen 1.0% w/w minimum

BENEFITS

- White free flowing powder which is easy to dissolve
- Highly concentrated for economy in use
- Low foaming formulation to improve rinsing of tanks
- Excellent for the removal of fatty soils and protein build ups
- Due to it's oxidizing power, it cleans and sanitises in one process

DIRECTIONS FOR USE

1. S11 is used for all CIP (Clean In Place) and SIP (Sterilization In Place) at a concentration of 5 –15kg / Litre (0.5–1.5% w/v) with water at 40–50°C and circulate in tank for approximately 10 to 15 minutes or until all grape stain has been removed.
2. An increase in water temperature will increase it's cleaning effectiveness.
3. Rinse mixing vessel with clean potable water.

HEALTH HAZARD INFORMATION

See separate Health and Safety Data Sheet available on request.

SUITABILITY OF CHEMICALS FOR FOOD PREPARATION AREAS

S11 is suitable for use in food processing plants.

PACKAGING

- 5kg White Poly Pails
- 220kg White Poly Pails
- 220kg closed head poly drums
