

Automatic Bag in Box & Stand up Pouch filler AUTOFLOW

Bag in Box Filler automatically fills hot and cold liquids into Bag in Box and Stand up Pouch packaging.

SPEED: Fills 3L bag in just 7 seconds.

CAPACITY: 300/3L bags per hour.

Simple to use: START button – machine automatically removes the tap, vacuums the bag, fills then closes the bag.

- Extremely versatile.
- Perfect for filling various liquids: juice, wine, milk, broth, oil, fruit & vegetable puree, cream, coffee, ice cream, soap, chemicals, etc.
- Fills Bag in Box bags from 1L to 30L.
- Fills Stand up Pouch packages from 0.75 to 5L.
- Also possible to fill 220L bags with a special filling gun.
- The filler can have optional interchangeable filling heads. This way with one filler you can fill bags with different closures, such as tap, milk tube, screw cap, simple cap, etc.
- Laser safety mechanism automatically stops & cancels the filling process in case of an accident.
- High-quality automatic filling head provides stable and smooth filling process.
- OPTIONAL: The buffer tank has an integrated liquid level control inside for regulation of overspill and level in the tank.

Processing with ProFruit

Berry and Fruit Crusher

Berry and fruit crusher is used for crushing products before further processing.

Mill has interchangeable sieves for different fruits/berrries/vegetables. The berry crusher can also crush stone fruits due to the special mill construction which does not damage the stone or seed.

- Powerful 5.5kw crusher engine.
- Small and compact size.
- Mounted on pivoting wheels.
- Product can be supplied in different variations.
- Has a bottom outlet for the crushed mash.

Pasteurizer

Electric ECO HEAT

Electric pasteurizer heats and pasteurizes various liquids before the filling process. Machine runs on electricity and is a more ecological choice.

The liquid comes into the tubular spiral surrounded by hot water which is heated by three electrical heating elements.

The heat from the water heats up the liquid and eliminates the bacteria.

- Available outputs:
300 L/h, 500 L/h

Fruit pressing

Belt Press POWERPRESS

Belt press POWERPRESS is designed for pressing fruit, berry and vegetable mass. Fruit mass is placed on the belt which presses it against cylinders.

The obtained juice flows into integrated collection tank under the press. Then the pump transfers the juice from the press to a desired tank for further processing. This pressing process is continuous.

Available in: 400 kg/h, 800 kg/h, 1500 kg/h & 3000 kg/h
