

Sentia Wine Analyzer Software Update:

Dear Valued Sentia Customer,

What is changing in the upcoming software release?

- New language packs will become available: Italian, Spanish, German, Portuguese, French, and Danish.
- Updated operating ranges allowing for tighter performance metrics will be introduced.
 - These ranges reflect expanded validation work, improved calibration methods, and testing across real-world wine applications.
 - The software update will support analytical confidence in the most common and valuable winery use-cases.
 - After the update, results will either reflect their value or < or > the newly established range limits

Updated test ranges:

Test	Range
FSO2	8-75ppm (mg/L)
MALIC ACID	0.25-5 g/L
ACETIC ACID	0.35-1.4 g/L
GLUCOSE	0.5-10 g/L
FRUCTOSE	0.5-10 g/L

What is coming next

- Sentia will continue expanding the test menu, including new analytes and sample types
- We will continue improving analytical quality, range, accuracy, and precision
- Improvements in ease of use, workflow, and operational convenience.

We remain committed to listening to winemakers, strengthening the platform, and delivering practical tools that help wineries make faster, better-informed decisions with confidence.
